Lunar Beast Prefabricated Templates

These templates are prefabricated to save time constructing a Lunar Beast. Simply select a beast type stat block and use the numbers based on your level and the size of the beast. When using these prefabs, you don't add any modifier from the Form Statistics or Form Size tables – they are already included.

You can replace the speed and vision of a standard template by choosing an option from the Standard Beast Movement table. This choice replaces all of the speed listings from the template and its blindsight or darkvision sense. You can't change one or the other, you must replace both the speed and the vision as shown on the table.

You can have only one target swallowed at a time.
